DETAILED ACTION

1. This office action is in response to Application Serial No. 10/714,754 filed on November 17, 2003 in which claims 1-20 are presented for examination.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," **"According to the invention,"** "The disclosure defined by this invention," "The disclosure describes," etc.

Priority Documents

3. Applicant claims priority of German Application Serial No. 10123956.4 filed on May 17/2001 through International Patent Serial No. PCT/DE02/01718 filed May 14, 2002, however, none of these documents and search reports have been received.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Fritzer et al. (US Pub. No. 2002/0084129).

In regard to claims 1-20, Fritzer et al. discloses a method for regulating a torque transmission system wherein a clutch torque is changed in function of a starting resistance of a vehicle in order to implement a strategy for starting the vehicle comprising the step of modifying the strategy so that the progression of the clutch torque is adjusted to a starting situation (see abstract and [0111] to [0120]). Fritzer also discloses that the strategy influences the progression of the clutch torque based on the engine speed wherein the starting situation of the vehicle on a hill, the clutch torque is built up slowly (see abstract and [0111] to [0120]). Fritzer further discloses that the

method further determine the velocity if the vehicle wherein a starting aid routine is integrated in the strategy (see abstract and [0111] to [0120]).
